

## Daily cruise report (04 February 2020)

Sabrina Speich, Chief Scientist

### 1. Objective

Today we recovered the 4 French drifters and started our route north. We continue our underway sampling.

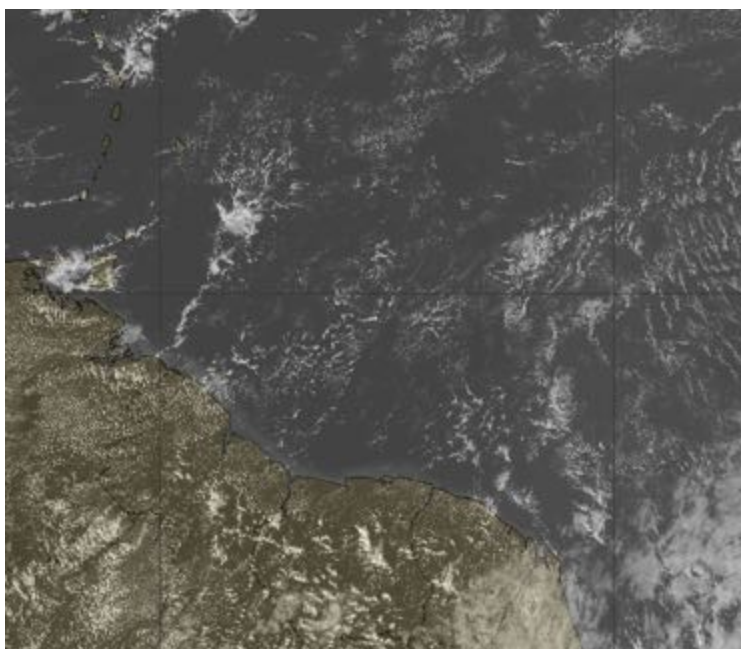

### 2. Synoptic Situation

Quite strong trade winds in dry atmosphere.

Sunny morning without clouds and a little more cloudy on the afternoon.

Easterly wind 15-20kt. The waves are about 4-5 feet.

Mesoscale cloud patterns (18utc): sugar

Time (local)	Coverage	Types	remarks
0800	0/8 High	-	
	1/8 Mid	Ac	
	1/8 Low	Cu	
1200	0/8 High	-	
	1/8 Mid	Ac	
	1/8 Low	Cu	
1600	0/8 High	-	
	3/8 Mid	Ac	
	2/8 Low	Cu	

**Inter-calibration:** No intercalibration today.

Autonomous systems deployed: 2 NOAA Drifters

Overflights: No overflights. We are too far south.

#### 4. Instrument Status

All instruments seem to work well. Today Vaisala radiosounding reception was more stable.

#### 5. Outlook

We will sail north to the deep Ring3 and first in the morning, we will work with 4 Sairdrones.

#### 6. Figures
